

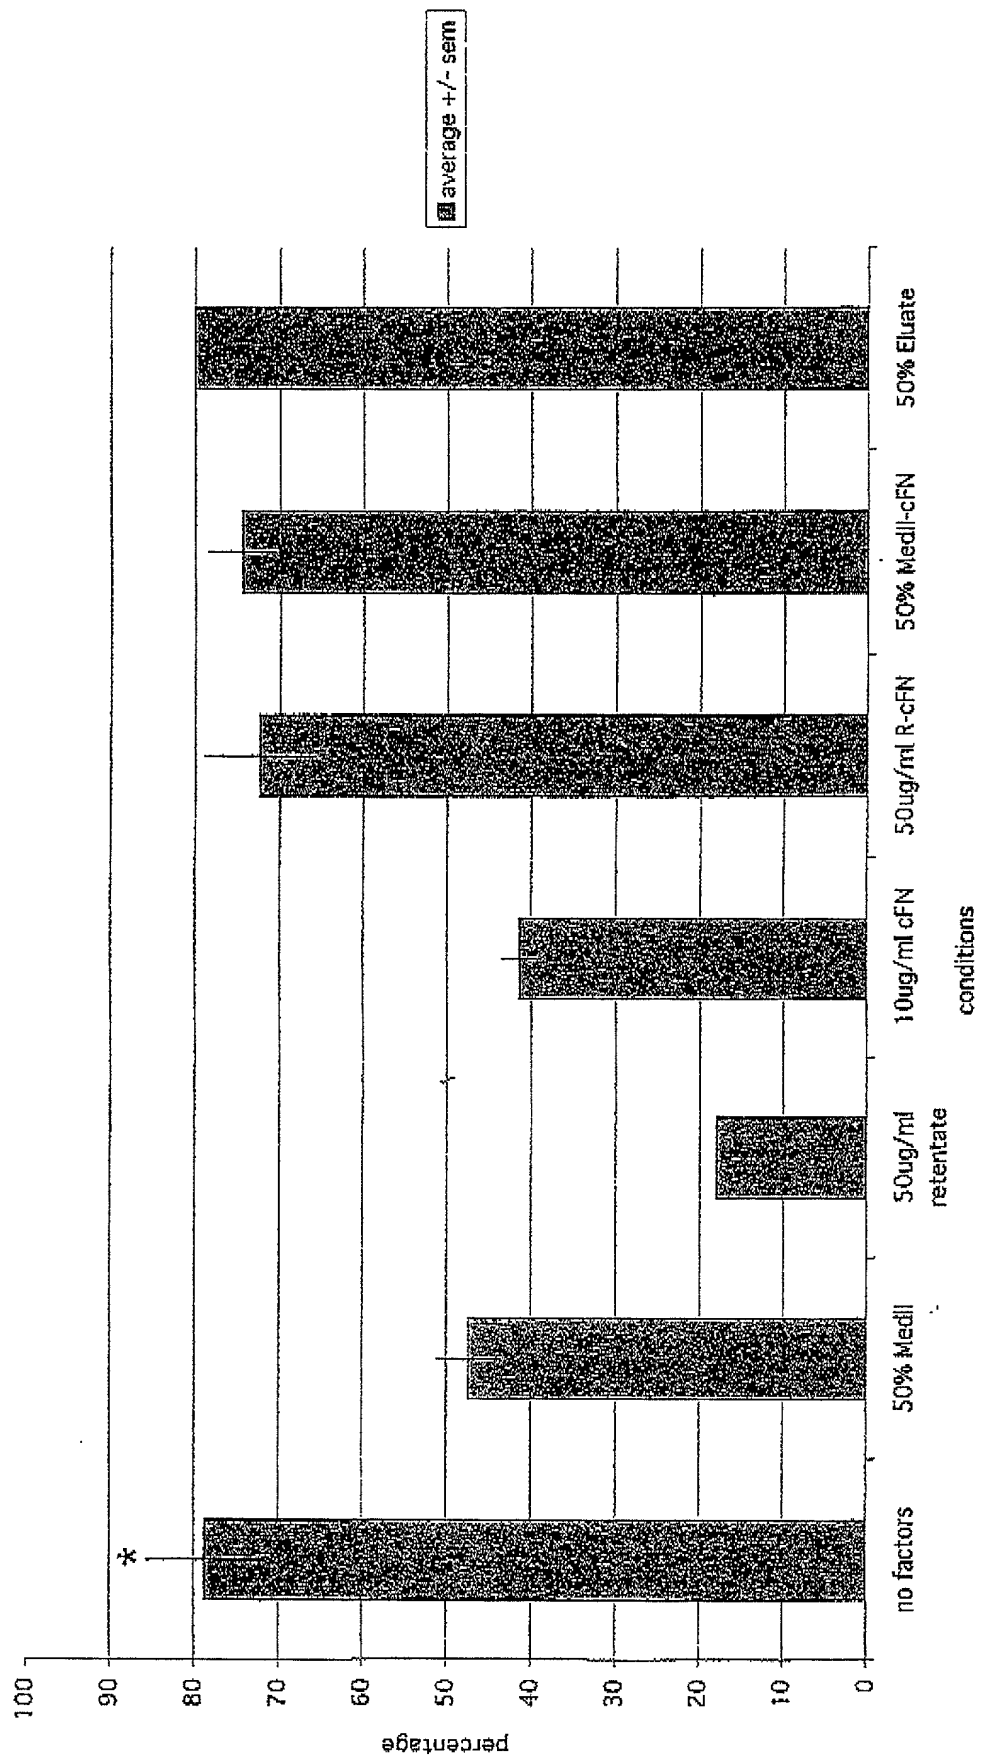

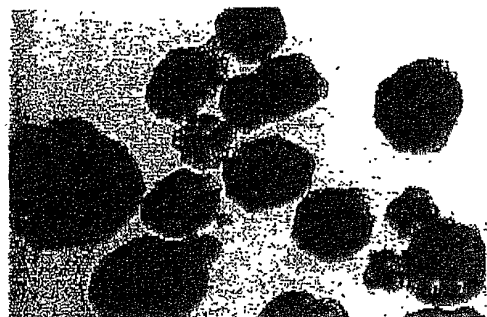

FIGURE 1

Percentage of macrophage forming bursts (seeded at day 2)

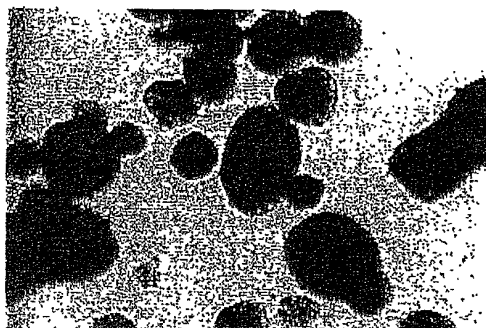

* statistically significant ($p > 0.05$) compared with 50%Medli and 10ug/ml cFN by student's t-test

EPL aggregates, Brachyury expression after 4 days in culture

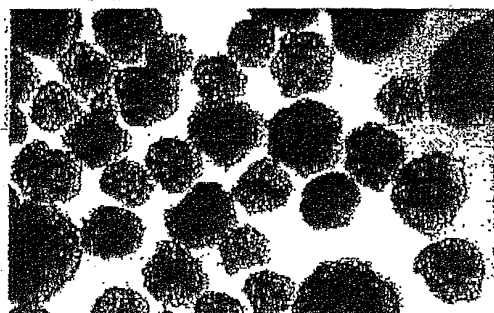

MedII

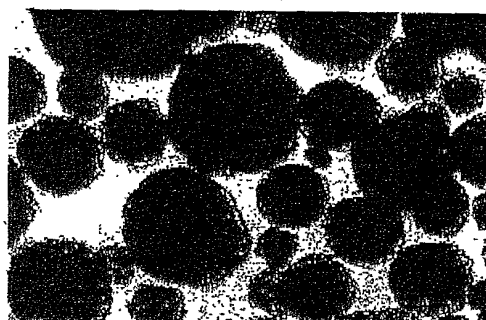

(b)

MedII stripped of cFN

Retentate

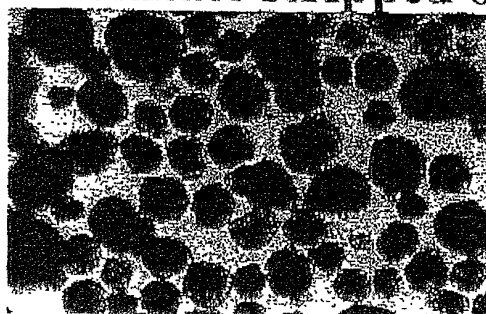

(d)

Retentate stripped of cFN

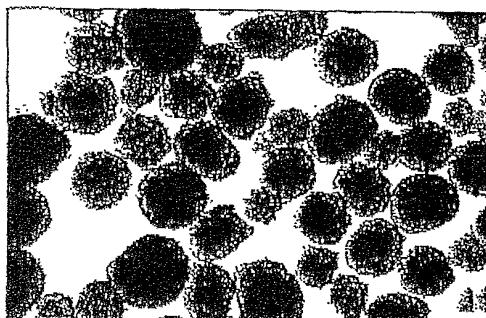

cFN

(f)

Eluate

(g)

No factors
